Introduction

Normec Verifavia provides a comprehensive one-day training on the EU Emissions Trading System 2 (ETS2), covering the regulatory framework and scope of the scheme, monitoring plan development, the verification process, and topics specific to ETS2 verification. The course guides participants from the origin and scope of ETS2 through the stepwise approach to building a compliant monitoring plan, before moving into the verification cycle, risk analysis, data sampling, and reporting requirements. By the end of the programme, participants will have a solid understanding in ETS2 compliance obligations and the practical, technical knowledge needed to develop monitoring plans, prepare for verification, and interpret verification outcomes with confidence.

Training objectives

Upon completion of the training course, you will be able to:

- Understand the origin and scope of ETS2 under the 2023 ETS Directive revision, and how it differs from the existing EU ETS.
- Identify the sectors and regulated entities covered by ETS2, and the four-stage compliance cycle of monitoring, annual reporting, verification, and surrender of allowances.
- Apply the core MRR-based principles and the 11-step stepwise approach to develop a compliant Monitoring Plan (MP).
- Classify fuel streams as major or de-minimis and apply the tier system to select the correct monitoring methodology.
- Understand uncertainty assessment concepts and the determination of the scope factor to identify end customers covered under ETS2.
- Understand the ETS2 verification process, including strategic analysis, risk analysis, and the development of a verification plan.
- Apply process and analytical verification procedures, including data sampling approaches and site visit requirements.
- Identify the verification checks specific to EU ETS2, including scope factor method verification by tier, and the criteria for an unsatisfactory verification opinion.
- Understand the consequences of non-compliance, including the per-tonne penalty for unsurrendered allowances.

Training presentation

The training will include 5 parts as per below:

Part 1 — ETS2 Overview & Context

- Origin and scope of ETS2 under the 2023 ETS Directive revision, covering fuels for buildings, road transport, and small industry, with fuel suppliers (not end consumers) as

the regulated entities
- The four-stage compliance cycle: monitoring, annual reporting, verification, and surrender of allowances
- Key regulatory milestones, from 2024 monitoring plan submission through to allowance trading commencing in 2028
- Division of responsibilities between regulated entities, verifiers, and the National Competent Authority (NCA)

Part 2 — Monitoring Plan Development

- Core MRR-based principles and the 11-step stepwise approach to developing a compliant Monitoring Plan (MP)
- Categorising regulated entities and fuel streams (major vs. de-minimis), and applying the tier system, including selection rules and exceptions
- Uncertainty assessment, scope factor determination, and calculation factors, including biomass, zero-rated fuels, and avoiding ETS1/ETS2 double counting
- Documentation requirements, keeping the MP current (significant vs. non-significant modifications), and simplifications for low-emission entities

Part 3 — Verification Process

- General requirements, scope of Annual Emissions Report (AER) verification, and the verification cycle, including eligibility checks
- Strategic and risk analysis: understanding entity activities, assessing risk, and building the verification plan
- Process and analytical procedures: data flow, IT systems, installation boundary checks, uncertainty management, and data gap and biomass checks
- Data sampling approaches, site visits, addressing misstatements and non-conformities, and verification report documentation

Part 4 — Topics Specific to EU ETS2 Verification

- Key verification checks for completeness of fuel streams and correct application of monitoring methodology
- Scope factor method verification by tier (Tier 1–3), including handling multiple methods and ETS1/ETS2 double counting checks
- Criteria for an unsatisfactory verification opinion, and addressing missing data and zero-rated fuels
- Consequences of non-compliance, including the per-tonne penalty for unsurrendered allowances, and reference resources for further study

Part 5 — EU ETS2 Verification Quiz

- Self-assessment quiz consolidating concepts from Parts 1–4
- Recommended as a knowledge check before sign-off on training completion

Training prerequisites

Being familiar with the training course subject matter, including EU carbon markets and GHG accounting principles. Basic familiarity with the existing EU ETS, monitoring and reporting concepts, or verification and assurance processes is recommended, though not mandatory.

Who should attend

This training is intended for professionals seeking an introduction to the EU Emissions Trading System 2 (ETS2), covering the regulatory framework, monitoring plan development, and verification requirements. It is suitable for personnel who need to understand ETS2 compliance obligations and the verification process, including:

Sustainability and environmental personnel, compliance and regulatory affairs personnel, fuel suppliers and their representatives, verifiers and auditors, quality and ESG personnel, consultants and advisors supporting regulated entities, and any staff involved in or impacted by ETS2 monitoring, reporting, or verification activities

This training is relevant across a range of industries, including fuel suppliers, building heating fuel providers, road transport fuel distributors, and small industry or other fuel users falling within the scope of ETS2.

Training schedule:

The training session will be conducted online via MS Teams. It will be delivered as a one-day training, offered twice, in French and in English, so that participants may choose the session best suited to them:

French session

Date – 13th October 2026

Time - 09:00 to 17:00 CET

English session

Date – 14th October 2026

Time - 09:00 to 17:00 CET

A one-hour lunch break is included in each session.

Commercial conditions and payment terms

The training is available at 600 EUR per participant. Upon receipt of the signed training agreement, an invoice will be issued to the participant. Full payment must be received no later than two weeks before the training commences. Failure to comply with this deadline may result in the cancellation of the training agreement, in accordance with the terms and conditions outlined below. All invoices are payable in full, with no partial payments accepted.

The Fees are exclusive of any applicable taxes, charges, levies, fees or duties of any governmental authority applicable to the Fees and the candidate shall pay any such taxes, charges, levies, fees or duties provided it is charged by Normec Verifavia in accordance with all applicable tax laws. Payment of the aforementioned fees shall be made without any set-off or counter claim (and to the full extent permitted by law, the parties renounce to such right of set-off) and free of deduction or withholding (except as required by law) of any taxes or governmental charges. If any deduction or withholding is required by law, participant shall pay the required amount to the relevant governmental authority, provide Normec Verifavia with an official receipt or certified copy or other documentation acceptable to Normec Verifavia evidencing the payment, and pay to Normec Verifavia in addition to the payment to which Normec Verifavia is otherwise entitled under this training Agreement, such additional amount as is necessary to ensure that the net amount actually received by Normec Verifavia free and clear of all taxes equals the full amount Normec Verifavia would have received had no such deduction or withholding been required.

It is the participant's responsibility to ensure a good and stable internet connection when attending the training. This training Agreement shall in all respects be governed by and construed in accordance with the laws of France.

Please send us a payment confirmation at training.verifavia@normecgroup.com once payment transfer has been completed. Training participants will not be accepted, and the training certificate will not be delivered before receipt of full payment.

Cancellation conditions:

Participants can appoint a substitute in case of non-participation. Otherwise, cancellation conditions apply as follows:

- Free, if cancellation is submitted at least four weeks prior to the training course,
- Full amount is due if cancellation is submitted later or if the participant starts the training course but does not appear connected after,
- Normec Verifavia reserves the right to cancel or postpone training for exceptional reasons. Any sums collected are then returned in case of cancellation

Registration:

- Please fill and sign the Training Agreement Form on the last page of this document to register to the training course and send it to: training.verifavia@normecgroup.com
- By registering for this training, the participant consents to the session being recorded and to Normec Verifavia sharing the recording for training and reference purposes only.
- Training participants will receive an invitation one week before the training course with all the details to connect to the online training session.

Recording and Confidentiality:

The training materials, recording, and session content remain the exclusive property of Normec Verifavia and are strictly confidential. Participants may not record, screen-capture, reproduce, distribute, or share the session or its materials, in whole or in part, with any third party, using any device or software.

Any breach of this clause may result in immediate termination of access without refund, and Normec Verifavia reserves the right to pursue legal action, including claims for damages.
